

A Secret Garden in the City

Interior designer Hilary Farr chooses Phantom's retractable door screens as the design-friendly option for her Toronto home

- LOCATION:** Toronto, Ontario
- STYLE:** Classic contemporary
- DESIGNER:** Hilary Farr Design
- PRODUCT:** Phantom Legacy™ retractable door screens
- MESH TYPE:** Fiberglass 18/14 mesh
- NEED:** Hilary Farr, a renowned interior designer and star of the popular home improvement TV series *Love It or List It*, needed a door screen that would let in the breeze without altering the design of the doorways. Wanting to connect the interior of her city home with the secluded and lush gardens outside, she looked for a solution that also would also maintain the views to the backyard.
- SOLUTION:** Phantom's Legacy screens were selected as the design-friendly option that would deliver relief from the bugs while letting in the breeze. The screens now connect the living room with an outdoor entertaining area, pulling out when needed and retracting into their color matched housings when not in use.

"Many of my clients have needed a screen that would not block their views and I don't want my design compromised by fixed screens. I always recommend Phantom's door screens as they really are perfect for every type of door."

- Hilary Farr, interior designer and co-host of the Love It or List It television show

OVERVIEW

Located in downtown Toronto, this custom designed home is a true mix of the best of both worlds: boasting modern design and clean lines, it also delivers a connection to the outdoors. Its sheltered backyard with the lush English-style garden provides the perfect getaway where Hilary enjoys spending time and entertaining friends and family. Also an eco-conscious designer, she needed to source door screens that would let in the breeze to cool the home while keeping out the bugs.

Phantom's door screens retract out of sight on either side of the door, maintaining the views to the backyard; the white color of the housings helps them blend into the door casings and does not take away from the design of the space.

APPLICATION HIGHLIGHTS

Insect-free natural ventilation

The retractable screens feature Phifer 18/14 insect mesh with 45% openness which allows the homeowner to open the doors to enjoy the summer breeze without having to worry about letting in the bugs.

Easy operation with secure closure

Legacy's integrated latching handle is durable and easy to use. It closes the screen securely to prevent accidental opening in breezy conditions.

Complements any doorway

Phantom's door screens blend with all types of doors without detracting from the building's design.
